Falls Road Primary

- ⇒ Fully Insulated Solarspan Building to be used as Classroom and Storage Area
- ⇒ 7 Walkways
- ⇒ Concrete Pads
- ⇒ Concrete Pathways
- ⇒ Electrical Work (lighting, aircons, data cables)

“The architectural team took our concept and designed a structure which is both visually impressive, has great structural strength and is built with the latest energy saving materials.

The workforce were extremely professional and accommodating. No query was too small or unimportant. They made every effort to work around the needs of the school and the students, taking particular care to minimise noise interruptions by scheduling these activities out of school hours.

The quality of the work is outstanding and where modifications and alterations were needed, these were done in a collaborative, efficient and effective manner.

This project was funded by the school and the P&C and Perth Better Homes were consistently mindful of the need to provide value for money.

The quality of the communication throughout the project was brilliant and I have absolutely no hesitation in recommending Perth Better Homes for future similar projects.”

Kind Regards,

David Ingle
Principle

Piara Waters Primary

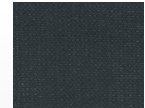

Scope of Works

- ⇒ Supply and Install Shade Sails
- ⇒ Circular Sandpit
- ⇒ Excavation
- ⇒ Limestone Retaining Wall
- ⇒ Woodchips to Surrounding Area
- ⇒ Coloured Concrete Pathway

- ⇒ Install Internal Walls and Door using Bondor Insulated Panels

Singleton Primary

Scope of Works

- ⇒ Supply and Install Shade Structure with Deck

Maintenance Program

At Perth Better Homes, we strive to provide top quality services to all our customers. Our Shade Sail Maintenance Program can save you time and money in the future!

- ⇒ Prevent any wear and tear during seasonal weather conditions
- ⇒ Keeps the Shade Sails in great condition
- ⇒ Prolongs the lifespan of your shade sails
- ⇒ Attend to any repairs needed during the winter months

Shade Sail Installation & Removal

Winter Removal

- ◇ Shade Sails shall be taken down during July school holidays or as requested by school

Summer Re-installation

- ◇ Shade Sails shall be re-installed during October school holidays or as requested by school

Aerial Photography

We will use a facility called **Nearmaps** in our office whereby we obtain **specialised aerial photography images of a site** to identify the location of each shade sail and mark with a code, prior to being taken down.

Storage of Shade Sails

The shade sails will be **labelled, bagged and stored** at our work premises during the winter months. We will ensure all shade sails are dry at the time of removal and prior to bagging to prevent the possibility of any mould forming during storage.

Inspection

We will remove all shade sails from bags, prior to re-installation and **carry out a thorough inspection of each shade sail prior to the summer installation of the shade sails.**
